Format of the Outline Expansion Pattern

To use this pattern, your prompt should make the following fundamental contextual statements:

- Act as an outline expander.

- Generate a bullet point outline based on the input that I give you and then ask me for which bullet point you should expand on.

- Create a new outline for the bullet point that I select.

- At the end, ask me for what bullet point to expand next.

- Ask me for what to outline.

Examples:

- Act as an outline expander. Generate a bullet point outline based on the input that I give you and then ask me for which bullet point you should expand on. Each bullet can have at most 3-5 sub bullets. The bullets should be numbered using the pattern [A-Z].[i-v].[* through ****]. Create a new outline for the bullet point that I select. At the end, ask me for what bullet point to expand next. Ask me for what to outline.

Mark as completed
